

North American Mangalarga Marchador Association

## VIRTUAL COMPETITION 2022

For 2022 we have two “events” for Marchador owners to participate in. The first is a conformation photo submission, the second is a video submission. All Marchador owners are encouraged to participate. Prizes will be awarded for the top 3 submissions in both categories.

Have fun!

Deadline for entries is September 30th 2022, results will be judged in October 2022 with entries available for viewing online at  
<https://www.youtube.com/channel/UCPqWIArUmQHEc00K8lcmQw>

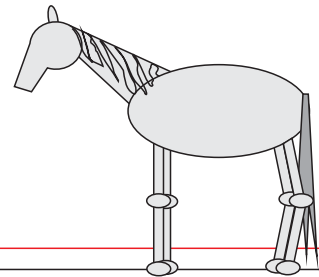

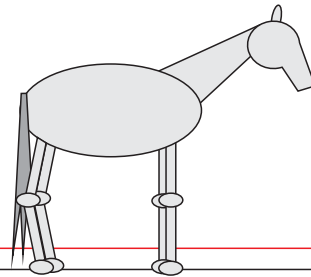

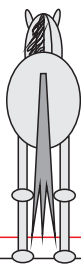

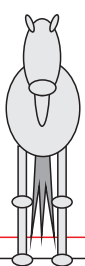

### CONFORMATION PHOTO SUBMISSION

The purpose of this submission is to learn to take good, attractive images of your horse. Image accuracy will be assessed by 3 other Marchador owners. Winning submissions will be based on photo quality, not horse quality.

Dr. George Villar has agreed to examine the submissions and offer conformation feedback to those who would like this information. Please check the box on your submission form for this option.

#### Guidelines:

- 1.) Have the horse stand on level, flat ground with a simple background with the head in a natural, relaxed position and the horse standing square.
- 2.) Take 4 images. Front, rear, left side, right side.
- 3.) Try to keep the horse in a the frame as close as possible, including hooves.

### VIDEO SUBMISSION

The purpose of this submission is to show you and your horse interacting. This video should be under 60 seconds and will show your horse sidling over to you to set up for mounting from a raised area such as a boulder, mounting block or stump. The rider mounts, then asks the horse to move into a straight walk and then halt, pause for 3 seconds, then pivot on the hind to change direction to retrace the steps already taken back up to the same mounting location. The rider then will have the horse side up to the mounting block on the opposite side from the mounting side. The rider then dismounts onto the block that was used for mounting.

#### Guidelines:

- 1.) Any tack or no tack
- 2.) Judged on efficiency of response, fluidity and control.
- 3.) Bonus for creativity (ie. distractions)
- 4.) Video can be taken by another person or by setting up the camera for solo video.
- 5.) Location should be on level ground
